Work Experience

Software Engineer

Rapidops Inc

Aug 2024 – Mar 2026

Ahmedabad, Gujarat

- Developed and maintained cross-platform mobile applications using **Flutter** across multiple domains including CRM, research, e-commerce, and workflow automation.
- Implemented solutions using various **state management techniques**, integrated REST APIs, Firebase, and local databases to deliver feature-rich mobile applications.
- Built and optimized advanced features including chat systems, push notifications, workflow automation, voice-to-text, deep linking, background processing, and offline-first experiences while improving application performance and maintainability.

Software Engineer Trainee

Rapidops Inc

Jan 2024 – Jul 2024

Ahmedabad, Gujarat

- Built foundational skills in Flutter and cross-platform development by working on real-world Android and tablet applications, contributing to UI implementation and user interaction flows.
- Gained hands-on experience in **Flutter, Node.js, and React.js**, building full-stack understanding and collaborating within an agile team environment.

Projects

Salesmate CRM:

- Developed and maintained a **B2B SaaS CRM** mobile application using Flutter, delivering scalable and user-centric solutions across multiple business modules.
- Implemented production-grade architecture using Clean Architecture, **Bloc State Management**, **REST API Integration**, and **Third-Party SDK Integrations**, ensuring maintainable and scalable codebases.
- Integrated customer communication features including **Support Ticket Systems**, Voice-to-Text, AI-Powered Text Generation, Deep Linking, and various CRM workflow modules.
- Configured **Multi-Environment Flavors**, optimized **Multi-Platform Support**, and developed advanced features such as **Voice Assistant Actions**, **Push Notifications**, and application lifecycle integrations.

Workflow AI:

- Developed a Flutter-based **workflow automation** application featuring a visual node editor and custom workflow execution engine.
- Integrated REST APIs, **AI services** (OpenAI/Gemini), local databases, JSON processing, and background services to support intelligent automation workflows.
- Developed automation modules for notification-based triggers, device actions, conditional logic, and real-time task execution.
- Designed a privacy-first, local-first architecture with workflow persistence, offline capabilities, and secure data processing to deliver a scalable automation platform.

Education

Vishwakarma Government Engineering College

Bachelor of Information Technology

2020-2024

Ahmedabad, Gujarat

Skills & Achievements

Languages: JavaScript, Dart, Python

Technologies: Flutter, React.js, Node.js, PostgreSQL, BLoC, GetX, Provider

Tools & Platforms: Git, Postman, Firebase, Supabase, Figma, Docker, Google Play Console

Achievements: Earned 500 Days LeetCode Badge
